

# COMPUTER CLUB

The meetings take place on the 2<sup>nd</sup> Wednesday in the month from 10:00 -12:00 at the Millennium Hall in the Main Hall.

The aim of the group is to help anyone with a computer to get a little more out of it. It helps if you have a sponge like ability to soak up information, because Bob tends to pump a lot of it out. We assume nothing about your knowledge or ability, only a willingness to learn a little more.

The format of the meetings is, each starts with a 45-minute talk focusing on a pre-announced subject followed by an hour or so of interactive workshop session to help members solve their problems. We have a computer available to demonstrate with and we hire a projector so that everyone can see what is happening.

If you are interested just come along or let Jan Roles or Bob Robinson know if you want to learn something in particular or are looking for a solution to a problem.

- 11th March Using the Internet, research train times to pteradactyls, shopping to banking. Is it the greatest thing since the tele-
- 8th April Spread Sheet, from basics
- 13th May Using Templates. Your own letterheading, shopping lists, envelopes or personal notelets; templates can save time,
- 10th June The History of Computing. "From Abacus to WATTSON?" All welcome, no computer knowledge needed.

*If you have suggestions or would like any changes please contact:*
